

GOLD FLEECE SHEEP DIP

Gold Fleece Dip is licenced for the prevention and treatment of blowfly strike, keds, lice and scab infestations on sheep.

NUMBER OF SHEEP	BATH SIZE																					
	500L		750L		1,000L		1,250L		1,500L		1,750L		2,000L		2,250L		2,500L		2,750L		3,000L	
	DIP CONCENTRATE TO START THE BATH:																					
	360ml (6 x 60ml)		540ml (9x 60ml)		720ml (12 x 60ml)		840ml (14 x 60ml)		1,020ml (17 x 60ml)		1,200ml (20 x 60ml)		1,380ml (23 x 60ml)		1,500ml (25 x 60ml)		1,680ml (28 x 60ml)		1,860ml (31 x 60ml)		2,040ml (34 x 60ml)	
	MAXIMUM CAPACITY (empty and start fresh when this number of sheep have passed through the bath)																					
	250 sheep		375 sheep		500 sheep		625 sheep		750 sheep		875 sheep		1,000 sheep		1,125 sheep		1,250 sheep		1,375 sheep		1,500 sheep	
TOP UP RATE																						
Top up rate: after every 36 sheep, add 180 ml of dip concentrate and return water to original level (3 x 60 ml)										Top up rate: after every 96 sheep, add 480 ml of dip concentrate and return water to original level (8 x 60 ml)

DO's

always wear correct PPE (apron, gloves, waterproof leggings and wellington boots. When handling dip concentrate, a face shield is required).

- Do only dip when the sheep can be dry for 2-4 days after dipping.
- Do follow manufacturer's instructions for initial mixing rates and bath replenishment rates.
- Do measure and know the size of your dip bath prior to dipping.
- Do keep the sheep in the dip bath for a full minute and plunge the head under at least twice.
- Do use a stopwatch to assist timing and a clicker to count sheep.
- Do clean out and empty the dip bath at the end of each day.
- Do release sheep to a holding pen after dipping. Allow sufficient time for excess dip to drain off, and provide them with water.
- Do only ever use Gold Fleece Dip in a plunge bath.
- Do adhere to the withdrawal period of 35 days.
- Do dip lambs separately from ewes.
- Do ensure that you dip all sheep on your farm at the same time and that dipped sheep are not mixed with undipped sheep.
- Do dispose of waste dip responsibly either via a licenced waste contractor or in accordance with a permit issued by the local environmental agency.
- Do refer to product packaging and the SPC for full product information.

DON'Ts

dip when the wool is wet or on a rainy day.

- Do not dip sheep on a full stomach or when the sheep are hot, tired or thirsty.
- Do not dip sheep suffering from open wounds or sores.
- Do not smoke, eat or drink whilst dipping.
- Do not add any other product to the dip bath.
- Do not use a levamisole drench within 14 days of dipping.
- Do not shear sheep for 3 months after dipping.
- Do not leave dip overnight. If you are dipping on separate days you must prepare a fresh bath each day, to avoid post-dipping lameness.
- Do not dip or handle dip concentrate in an enclosed area, to avoid inhaling vapour.
- Do not contaminate waterways with dip concentrate or used dip wash. It is an offence to permit any poisonous, noxious or polluting matter to enter any river, stream or watercourse.

Gold Fleece Sheep Dip, 608 mg/ml Concentrate for Dip Emulsion is a POM-VPS medicine containing 608 mg/ml diazinon for dilution for plunge dipping. It is licenced for the prevention and treatment of Blowfly Strike, Ticks, Keds, Lice and Scab infestations. For further information see the SPC available on the VMD website. Advice should be sought from the prescriber. Prescription decisions are for the person issuing the prescription alone. This promotion is only intended for farmers in England, Scotland and Wales. Date prepared: October 2025. MCR2708. Bimeda can be contacted on +44 (0)1248 725 400 or uksales@bimeda.com. Use Medicines Responsibly. Noah.co.uk/responsible.
