- Using 18 gauge, 25 – 40 mm hypodermic needle
- 50ml vial stoppers must not be breached more than 30 times
- 200ml vial stoppers must not be breached more than 50 times

### WITHDRAWALS

- 108 days meat withdrawal
- Permitted for use during pregnancy but not permitted for use in lactating animals producing milk for human consumption within 80 days of expected parturition

### DOSAGE

- 0.5 ml per 50 kg bodyweight (1.0 mg per kg bodyweight)
- 100kg BW is a 1ml dose
- 250kg BW is a 2.5ml dose
- 500kg BW is a 5ml dose

### BODYWEIGHT (KG)

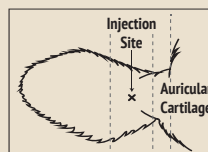

100	150	200	250	300	350	400	450	500
1	1.5	2	2.5	3	3.5	4	4.5	5

### DOSAGE (ML)

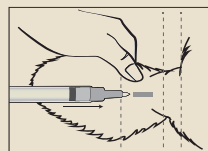

### EAR INJECTION PROCEDURE

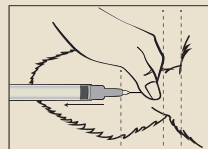

- Shake well before use

- The injection site is approximately 3.5 cm (1.5 inches) distal to the distal edge of the auricular cartilage

- Use one hand to grasp and steady the ear.
- Inject subcutaneously using an 18-gauge x 1 inch needle.

- Inject contents. Depot should be just distal to the distal edge of the auricular cartilage.
- Apply pressure at the point of insertion as the needle is withdrawn from the skin to help seal the opening.

Prescription decisions are for the prescriber only.

Moxisolv LA 100mg/ml Solution for Injection for Cattle is a POM-VPS medicine containing 100mg/ml moxidectin. It is licensed for cattle weighing from 100 to 500kg body weight, for treatment and prevention of mixed infestations of gastro-intestinal nematodes, respiratory nematodes and certain arthropod parasites. \*Duration of cover is species dependent. Check the SPC for duration of protection against specific parasites. Full product information is available on the SPC on the VMD website. Advice should be sought from the prescriber. Prescription decisions are for the person issuing the prescription alone. This promotion is only intended for farmers in England, Scotland and Wales. Date prepared: October 2025.
